Application for Dust Control on Gravel Roads in Montgomery County, Iowa

Name of Applicant: _____

Address: _____

Telephone Number: _____

Email Address: _____

Location: Section No. _____, Township Name: _____

Length of Dust Control Treatment _____ feet.

Starting point of application: _____ to _____

Work to be done by (name of Contractor): _____

Address: _____

Telephone Number: _____

Email Address: _____

Material to be used: _____ No. of applications: _____

The application and maintenance of chemicals or other products on gravel surfaced roads to control dust shall be by permit only and in accordance with the following specifications and conditions:

The homeowner shall be responsible for clearly flagging their treatment area throughout the entire dust control season.

Dust control products may be applied only by an approved contractor Holding a valid permit and using a County Engineer approved product.

The application rate shall be determined by the contractor. Any or all claims for damages to vehicles as a result of the applied dust control product shall be borne by the person or persons applying the dust control product

The County Engineer's office shall be notified 5 working days in advance of the dust control product being applied so that the roadway may be properly shaped. This will also apply to any reapplication of dust control products in case any repair shaping is needed. The contractor shall provide a complete list of dust control application sites to Montgomery County Secondary Roads for use by the maintenance department to coordinate maintenance activities.

Montgomery County reserves the right to rework the treated area and maintain it as loose granular surface if the roadway surface becomes unacceptable to the County. The County Engineer's judgment shall be the sole determining factor on reworking treated areas to a loose granular surface. The county shall not be responsible for any costs associated with reapplication of dust control products if the area is not clearly marked or if reshaping is required to repair the treated area.

The work in right of way permit shall go into effect on May 1, 2020 and expire on October 1, 2020, so the treated area can be worked prior to winter.

The contractor's material, application rate, and performance shall be subject to applicant-contractor agreement.
